

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A synthetic resin container, comprising:
 - a neck;
 - a bottom;
 - a body positioned between the neck and the bottom, the body including an in-molded label having left and right edges;
 - a thick portion formed on an inner surface of the body which is adjacent to and under the edges of the label; and
 - a vertical, curved rib extending along the left and right edges of the label,wherein the vertical, curved rib is contiguous with the left and right edges of the label.
2. (Previously Presented) A synthetic resin container, comprising:
 - a neck;
 - a bottom;
 - a body positioned between the neck and the bottom, the body having upper, lower, left and right portions and including an in-molded label;
 - a thick portion formed on an inner surface of the body which is adjacent to and under an edge of the label; and
 - lateral, curved ribs extending along the upper and lower portions, and vertical, curved ribs extending along the left and right portions of the body.
3. (Previously Presented) A synthetic resin container, comprising:
 - a neck;
 - a bottom;

a body positioned between the neck and the bottom, the body having an in-molded label having edges;

a thick portion formed on an inner surface of the body which is adjacent to and under the edges of the label; and

a lateral, curved rib and at least a vertical, curved rib extending along the edges of the label, wherein the edges of the label are positioned in the ribs.

4. (Previously Presented) A wall of a synthetic resin container, comprising:

a wall surface;

a label having left and right edges, the label formed into the wall surface by an in-mold; and

a thick portion formed on an inner surface of the wall surface which is adjacent to and under the edges of the label, wherein the left and right edges having a recessed, corrugate shape formed in the wall surface.

5. (Previously Presented) A synthetic resin container, comprising:

a neck;

a bottom;

a body positioned between the neck and the bottom, the body including an in-molded label having corrugate shaped edges; and

a thick portion formed on an inner surface of the body which is adjacent to and under the edges of the label, wherein the body is provided with a plurality of recessed, concave portions disposed along left and right edges of the label with equal intervals in a vertical direction, positioning the edges of the label in said concave portions.

6. (Currently Amended) A synthetic resin container, comprising:

a neck;

a bottom; and

a body positioned between the neck and the bottom, the body including an in-molded label, wherein a thick portion is formed on an inner surface of the body adjacent to and under an edge of the ~~label~~ label, and ~~wherein~~ the thick portion is not formed under the entire label, and the thick portion spans at least the edge of the label.
